

InxPROFIdrive V3.0

Release Notes

Status	RELEASED
Date	2016-01-20
Summary	Refactoring of the source code to get a better modularity and remove dependency. Drive AC4 and Encoder class 3 examples provided

Changes in this version

Changes in v3.0 since v2.1

- rework the source code for better modularity and remove dependency to Hilscher components. Examples based on Hilscher PROFINET IO Device boards need to use the Hilscher framework which adopts to Hilscher stack API.
- add Drive application class 4 (isochronous) example
- add Encoder class 3 example

Restrictions

examples are based on Hilscher PROFINET IO Device products. If another PROFINET Product used, adaption layer shall be created.

Resources

PROFIdrive Profile is a part of an example application which uses it and demonstrates the functions. The profile implementation can be found in examples under "\\Components\\PROFIdrive Profile\".

Ressorce	Description	Type
Drive AC4 Example.zip	Example implementing a drive application class 4	VisualStudio Example
