

EtherCAT Firmware V5.3 for netX 90 - Release Delayed

Unfortunately we have to delay the final release of EtherCAT Slave Firmware V5.3 by another 4 weeks.
New product release is planned for September 22nd 2021.

New features in ECS V5.3

- SoE (Servodrive-Profile over EtherCAT)
- AoE (ADS over EtherCAT - ETG 1020)
- VoE (vendor-specific protocol over EtherCAT)
- DC sync timestamp over DPM
- configure the Mailbox StartOffsets via Set Configuration Reques

A pre-release firmware is available on request.
